Justification of the Sustainability, Growth and Actions against Inequalities Theme

The growth of societies will only result in sustainable socioeconomic development if related to actions against inequalities. Thus, research is needed to develop techniques and products, to put forward theoretical analyses and critical discussions about growth in its different dimensions - economic, demographic, technological, urban, educational - and which seek to face inequalities, whether resulting from the processes of exploitation of natural resources, whether social, political or legal, engendered in today's society. It is acknowledged that these processes result in forms of social, racial, ethnic, economic, religious, sexual orientation and identity, gender, etc., which are manifested in the institutions, power relations, policies, norms and rights which stimulate or combat, in multiple aspects, both growth and inequality. Such investigations and actions, developed in different fields of knowledge, respond to Brazilian and different countries' demands, and aim to promote the production of Sustainability, Growth and Actions Against Inequalities.
